Subject: Chemicals in plant

Jason,

Most of our chemicals are the alpha-beta terpene copolymer.

Other chemicals in the plant are:

Mono and Di ammonium phosphate
Mono potassium phosphate
Urea
Ammonium and Potassium phosphate
EDTA chelated with either Calcium, Zinc, Manganese, or free nonchelated EDTA
Iron EDDHA – an iron chelate that's easily soluble and colors the water red
Liquid Tint Patent B – Blue dye in our dry fertilizers
Seaweed and seaplant extracts
Amino Acid Liquids

Thanks,
Matt Nelson
